

Become part of our dynamic and highly motivated team and help us shape the future of AI based learning and development. We enable our customers to upskill their workforce in all skills relevant for the future and thus remain competitive. On the Peers platform we create learning paths that combine the best learning offers in the market and recommend the best next move for each individual employee. You will work together with a strong C-Level team and bring our amazing AI-enabled platform business forward.

Become a

PRODUCT DESIGNER (m/w/x)

for our team in Berlin.

YOUR TASKS

- Take responsibility for the UX and UI design of our platform
- Conduct user research and product testing with B2B customers
- Develop wireframes and user flows for development
- Create a gorgeous UI design for the platform
- Support in designs for marketing and drive CI forward
- Work and collaborate as part of a multidisciplinary scrum team

YOUR PROFILE

- BA in design or similar relevant field
- 3+ years in UX and UI design
- Experience with usability testing, interaction design, user flows and similar concepts
- Familiar with state of the art design tools (such as Invision, Zeplin, Adobe Suite, Sketch)
- Familiar with agile programming methodologies (such as Scrum, Kanban, design thinking, ...)
- Fluent in English (written and verbal), German is a plus

WHY US

- Work closely with our founders and incredible team and shape our product
- Build up a meaningful product that takes care of every company's most valuable asset: their employees
- Feel empowered to take responsibility from day one, knowing that we have got your back through our positive feedback culture and team spirit
- Enjoy the options of working in our awesome co-working space or from home and flexible working hours as part of the Peers work culture
