

# Backend Engineer - Student Job (20h/w)

Join Team Motius and become part of an unique tech community!

Being part of our software engineering cluster, you join one particular research & development project as a Backend Engineer for minimum 6 months.

For instance, you could join us building the backend of a platform aimed at bringing startups and investors together for particular tech challenges, which also includes a chatbot.

In another project, we make smart meters really smart and work on the infrastructure of the smart city of tomorrow. Part of this is a complex distributed system of several services.

## YOUR PROFILE

- Backend: We love Django but we are known to use Node (& Express), Flask, etc.
- You know when to use relational DBs and when to use NoSQL DBs
- You know what REST means, really
- You know the difference between Redis and Reddit
- Writing tests is not lame
- Having worked with Docker, GitLab CI or comparable tools is an advantage

## WHAT WE OFFER

- Job variation: work on new products with changing stacks every couple of months
- Impact: taking over responsibility quickly
- Drive & energy: join a young and skilled tech team of roughly 50 developers / engineers from different fields of work
- Community: Become a member of our family and join hackathons, parties, meetups, and workshops
- An above-average salary, flexible working hours, and homeoffice

## ABOUT MOTIUS

Motius is a German R&D company with the vision to enable young talents by giving them the opportunity to impact the industry and innovate in the fields of mobility, smart city, IoT, Big Data, FinTech, etc. with technologies including A.I., AR, VR, Blockchain and more. The base of our unique company structure is a Talent Pool - a huge Tech Community - which is an essential part of Motius as it brings together techies from different fields and matches them in interdisciplinary teams. In this community you can find students, young professionals and freelancers that all are curious and love to collaborate to create new products and prototypes. The opportunity to explore new tech, a growth mindset and at the same time working on professional projects makes Motius the place-to-be for talented techies.

## SOUNDS GOOD?
